

# International Shiloh Shepherd Registry, Inc. Breeder Survey

## Sponsored by the Shiloh Shepherd Dog Club of America, Inc.

**Litter Survey—2000 - for litters born 91-93 (group A), 94-96 (group B), 97-99 (group C)**

**Upon completion, please mail this survey to: TCCP, 702 Rein Dr., Killeen, TX 76542**

Fill out the litter information below. Then, please contact the people who bought these puppies. Explain to them we're doing a survey and need to know whether their puppy has been healthy or diagnosed with a genetic disease. If a disease has been diagnosed, enter the name of the disease on the reverse side of this sheet. If the puppy buyer isn't sure of the correct diagnosis, ask them to call their vet. As you can see, data may be reported on the same puppy by the new owner for the regular survey and by you for the litter survey. This is to be expected—they are two separate surveys. If you can't follow up on all of your litters, indicate which litter(s) you were able to track. If after tracking puppies in a litter, you can't find one or two because people moved, etc. let us know the status of the ones you're reporting on and indicate how many you couldn't locate. We need both healthy puppies and those with genetic diseases included to make this survey worthwhile. *Please print or write legibly.*

1. Average size of litters? \_\_\_\_\_ Smallest Litter? \_\_\_\_\_ Largest Litter? \_\_\_\_\_
2. How many stud dogs do you own? \_\_\_\_\_ Brood Bitches? \_\_\_\_\_
3. At what age do you normally breed a bitch for the first time? \_\_\_\_\_
